Mysore Economic Conference.

Dated Bangalore the 9th October 1917.

From

P.G.D'Souza, Esq., B.A., B.L.,

Secretary, Mysore Economic Conference,

Bangalore.

To

P.G.D'Souza, Esq., B.A., B.L.,

Secretary to Government,

Departments of Education and Agriculture,

B a n g a l o r e.

Sir,

I am directed to forward herewith for orders of Government copy of letter No.1900 dated the 5th January 1917 together with enclosures from the Secretary Agrifcultural Committee forwarding copy of the Resolution of the Agricultural Committee passed at their meeting held on 25th November 1916 on the subject of establishing manure depots at certain taluk Headquarters.

I have the honour to be,

Sir,

Your most obedient servant,

M Seshachandra Rao

For Secretary.

PsR/

Copy of letter No.1900 dated the 5th January 1917 from the Secretary to the Agricultural Committee to the Secretary, Mysore Economic Conference, Bangalore.

---

With reference to your letter No.1908-1909 dated the 6th November 1916, I am directed to forward herewith an extract 3 of the proceedings of the 51st monthly meeting of the Agricultural Committee, held on 25th November 1916 on the subject of starting manure depots at Taluk Head Quaters.

---

M Ramachandra

For Secretary.

Psk/

Extract of para 3 from the Proceedings of the 52st monthly meeting of the Agricultural Committee, held on 25th November 1916

3. Manure Depots in Taluk Places. (a) Communications from the Deputy Commissioners and Presidents of District Committees of Districts on the subject of opening manure depots at Taluk Head Quarters.

(b) Letter No.1908-1909, dated 6th November 1916, from the Secretary, Economic Conference, forwarding for opinion letter No.152 dated 11th October 1916, from the Deputy Commissioner, Bangalore District, suggesting that depots for the supply of manure to sugar cane growers might be opened at Devanhalli, Anekal and Dodballapur

(c) Note by Dr.L.C.Coleman on the organisation and improvement of the supply of manure in Mysore.

A rough scheme prepared by the Secretary had been furnished to the District Committees as a basis for discussion. The scheme and a summary of the opinions of the District Committees on it are given as Appendices I and II.

Dr.Coleman's note after a brief survey of existing conditions laid stress on the need for preventing waste and organising a supply of commercial manures. There was a very large and rapidly growing demand for oil cake manure. It was absolutely necessary to utilise in the State all the oil seeds now being exported and indeed the expandion expected in sugarcane cultivation under the Kannambadi Reservoir within the year would alone absorb twice the quantity of cake which could be got by retaining the exported oil seed. The production of oil seed should also be vastly increased. Oil crushing plants should be established by Government initiative if necessary at various suitable centres in Districts which had the largest acreage under oil seeds. An attempt should also be made to tap sources of supply in other parts of India, such as fish manure from the West Coast and oil cake from the Madras Presidency through Hindupur. As the advantage of using

bone meal for paddy became more widely known, much of the bone now exported would be used up in the country. Possibly atmospheric nitrogen could be fixed by manufacturing calcium cyanamide with the aid of electric power.

In regard to distribution. depots were really needed only where manures were to be newly introduced and had to be got from afar. There was however a promising field before cooperative manure companies especially in the western parts of the State.

To summarise the points for consideration were:-

(i) The utilisation of oil seeds and bone now being exported and tapping supplied from outside Mysore.

(ii) Forming plantations of honge and other manurial trees and extending use of green manure.

(iii) Organisation of supply to western parts of the State.

(iv) Fixing atmospheric nitrogen by manufacturing calcium cyanamide.

(v) Prevention of waste of cattle manure.

Dr.Coleman said that the Agricultural Department was devoting attention to the introduction of oil cake manure for sugarcane in parts where the practice was little known but beyond this it could not possibly think of opening and running depots owing to the paucity of trained men.

There was a discussion as to the selection of agencies for distribution of the manure. Dr.Coleman said the Agricultural Department could not, for reasons explained by him, establish depots but could get together as large a supply of manure as might be required. He suggested that Cooperative Societies could do useful work in this line. Two societies of the sort had been started in Bombay of which one had done very well.

Mr.M.A.Narayana Iyengar said that it was difficult to start a new Cooperative Society for the specific purpose of selling manure which consisted practically of but one deal a year.

It was suggested that where possible Taluk Progress Committees might be entrusted with the business but then, there was the question of funds.

Mr.M.A.Narayana Iyengar said that though new cooperative societies could not be started expressly for selling manure, he thought existing societies could very easily take up the business If Dr.Coleman selected places where depots were desirable, it would be easy to communicate with cooperative societies existing there and not only to ascertain the demand for manure at each place but to place the societies in funds for making purchases.

Dr.Coleman said he would gladly furnish a list of such places.

It was then resolved that the following line of action be adopted:-

Resolution 1. (i) The Director of Agriculture to kindly select the places where manure depots could most usefully be started and furnish a list of them to the Registrar of Cooperative Societies.

(ii) The Registrar of Cooperative Societies to kindly ascertain from cooperative Societies at those places the possibility of their taking up the business and the strength of the local demand from manure and to take steps to place them in funds to purchase the supply wanted. The Registrar to intimate the result of the action taken as above to the Director of Agriculture.

(iii) The Director of Agriculture to kindly take the necessary further steps to secure and consign manure to the Cooperative Societies concerned and to furnish this Committee with an account of the working of this Scheme at the end of 6 months.

(iv) The work of popularising oil cake in new areas to continue to be done by the Agricultural Department as hithertofore.

(v) Dr.Coleman's note to be prihted as a bulletin in English and Kannada.

On the specific proposals of the Chitaldrug District Committee

10

for starting depots at Chitaldrug, Haribar and Hiriyur, Dr.Coleman said that a depot would be organised at Hiriyur from the Department and Mr.Narayana Iyengar undertook to ascertain ~~xxxxx~~ whether the Cooperative Societies in Chitaldrug and Hiriyur would take up the work.

N Ramesa Rao

Secretary.

## Appendix I.

11

Rough scheme for the organisation of manure depots.

(By the Secretary)

1. Manure depots should be located at all Head Quarter Stations under the direct control of the Amildar.

2. Amildars should be authorised to issue loans in manure to the extent of their powers of sanction under the Takavi Loans, the value being recoverable after the harvest and being a charge of the crop entitled to precedence over all charges except only land revenue for the year.

3. Loans of manure should, as a rule, be issued only on applications countersigned by the District Agricultural Inspector but in special cases for reasons to be stated by him, the Amildar may dispense with such countersignature.

4. Manure may be sold for cash without any restriction whatever, but without prejudice to the requirements of applicants for loans approved by the Agricultural Inspector.

5. The Taluk Progress Committees should constitute themselves into agencies for the purchase and stocking of oil cake for manure and of other manures recommended by the Agricultural Department for the principal crops grown in the locality.

6. Amildars should frame a rough forecast of the kinds and quantities of manure required by them for issue during the next year, and the extent of cooperation that can be expected from the Taluk Progress Committees.

## Appendix II.

12

Summary of opinions of District Committees on the scheme sent from the Agricultural Committee.

1. Bangalore. The Department of Agriculture have already made a beginning in this direction. The results of the work may be awaited for about 2 or 3 years before taking action on the lines suggested in the scheme.

Arrangements should be made for the cheap supply of oil cake locally as otherwise the cost of transport of the commodity from Bangalore being rather prohibitive, it would be difficult to induce ryots to go in for its use. For this purpose, oil crushing should be encouraged throughout the State by grant of liberal subsidies or other forms of State-aid. The District Committee invite suggestions from the Central Agricultural and Industries Committee on the question of developing this industry.

2. Kolar. Manure depots as proposed are very useful. Manure should be supplied by the Department of Agriculture for distribution and issued by the Amildars as far as possible, on the recommendation of an officer of the Agricultural Department.

3. Mysore. Such depots are quite essential. The proposed scheme is suitable.

4. Tumkur. Agree with the scheme but suggest that the control of the depots should not vest in the Amildars who are already overworked. The Amildars should sanction loans in cash and the actual sale of manure should be entrusted to some local merchant or other organisation, such as a Cooperative Society on a reasonable commission. The Department might stock manure with such agency.

The maximum amount of the loan which can be granted by the Amildars under the Takavi Rules should be raised from Rs.200/- to 500/-

5. Hassan. Manure depots are very desirable, but should be in the control of the Agricultural Department. The commodity should

17

be sold invariably for cash as ryots can always obtain takavi loan from Amildars without delay.

6. Kadur. Generally approve of the proposed scheme with the following modifications:-

(i) The forecast should be prepared by the Agricultural Inspecto

(ii) The depot should be under the management of the Agricultura Department.

(iii) Manure should be issued by the Amildar and amounts recovered by him on indents countersigned by the Agricultural Inspector.

7. Shimoga. Scheme not very practicable. Manure could preferably be stocked by the Agricultural Department with Taluk Progress Committees for cash sale to bona fide agriculturists. Poorer ryo might obtain takavi loans from Amildars and buy the manure from t Progress Committees.

8. Chitaldrug. A beginning may be made with depots in 3 places, Hiriyur, Chitaldrug and Harihar, with a stock of 50 tons of oil cakes in each depot, on condition (1) that an advance of Rs.120/- should be made by the Taluk Progress Committee for incidental expenses such as house rent, establishment charges, etc., to be recouped from the sale proceeds, (2) that the price of the manure should be fixed taking driage and wastage into account and (3) that the sale should invariably be for cash.

The cost of the 50 tons of cake which is estimated at Rs.2,000 to 2,500 should be advanced by the Central Agricultural Committee or the Department of Agriculture.

---

"COPY"

M. Rama Rao

Secretary.

As regards encouragement for stock breeding whether it be the maintenance of a stallion, a bull or a he-buffalo, the Madras ~~xxx~~ rules may be adopted as shown in the enclosed draft.

This scheme will be helpful to the people in several ways and within 5 years will encourage many leading ryots to maintain good breeding animals in a large number of villages.

(a) In the case of large cattle owners, the proposed liberal grant will act as a powerful incentive for maintaining breeding animals in a good condition and subjecting them to periodical examination.

(b) In the case of villages in the interior where there are no breeding animals at present, it will enable the villagers to maintain a good breeding animal as its cost of maintenance will be almost met by the grant and the fees for covering will leave a good margin of profit.

A grant of Rs.125/- to Rs.150/- a year will be made to an individual or a society for purchasing and maintaining at his or at its cost a good breeding bull, he-buffalo or a stallion, subject to the following conditions:-

(1) The grant will be made by the Deputy Commissioner/Assistant Resident, of the District Committee at the end of the official year on a report of inspection received from Superintendent, Civil Veterinary Department. It will be renewable every year for the same animal for a maximum period of 4 years. The grant will be withdrawn whenever the animal becomes disabled or a change of animal is considered essenti

2. The stallion, bull or he-buffalo should be housed properly and maintained, ~~the~~ in good condition.

3. ~~That~~ A register of service by the animal showing the date, month and year should be maintained, the number of covering in the year not falling below 40.

4. The owner of the animal is authorised to levy for each service a fee to be fixed by the Deputy Commissioner ~~in the first instance when application~~ at the time of the award of subvention after due consideration of the quality of the breeding animal and the conditions of the locality.

The registers will be in the following printed form which will be supplied free from the Agricultural Committee to the Districts for distribution.

In each District, a register of the awards of subventions made under the rules shall be maintained in the following forms and after each award, a certified copy of the entry relating thereto shall be delivered to the owner of the breeding animal.

1. Name of village, taluk and District.
2. Name of owner of the stallion, bull or buffalo.
3. Age, breed, pedigree and marks of identification of the animal.
4. The cost for which and the locality from which it was purchased.
5. The date from which it has been maintained.
6. Date and authority of award.
7. Date and authority of removal.

1. Date, month and year.
2. Description of the animal covered including its age and the number of foals or calves she has had previously.
3. Fees collected.
4. Name of its owner and village.
5. The result of the covering.

All the breeding animals to which subventions have been granted in a District shall be inspected not less than once a year by an officer of the Civil Veterinary Department who shall within a week after inspecting submit a report to the Deputy Commissioner in the subjoined form.

Report of inspection.

1. Name of village, Taluk and District.
2. Name of owner of the breeding animal.
3. Age, breed, pedigree and marks of identification.
4. The cost for which and the locality from which it was purchased.
5. The date from which it has been maintained.
6. Date and authority of award.
7. Date and authority of removal.
8. Condition of animal, at all and previous.
9. No. of coverings since last inspection.
10. Has the service register been properly maintained?
11. No. of calves or foals due to this breeding animal inspected, with remarks, if any.

Extract pf para 84 from the proceedings of the 64th monthly meeting of the Agricultural Committee, held on 23rd March 1918.

13

---

19. Live Stock and Dairying. Read report of the Sub Committee on Live Stock and Dairying, which met on 22nd March 1918, approving of the note of Mr.H.Rangaswamiengar (with certain modification) on the subject of granting subventions for encouraging the maintenance of breeding bulls, Buffaloes and stallions. (Appendix G.)

Resolution 9. Resolved that the scheme be accepted in toto and submitted to Government for sanction.

## Breeding bull.

Scheme approved by Government for the distribution of bulls:

Madras.

A grant of Rs.100/- a year is made to an individual or a society in consideration of the purchase and maintenance at his or at its cost of an approved breeding bull subject to the observan of the conditions detailed below:-

The grant is made at the end of the year after the inspection of the bull and is renewable at ddiscretion year after year for the same animal and on the same conditions up to a maximum of three years. The conditions to which the grant will be subject are:-

(1) That the bull should be properly housed and maintained in good condition.

(2) That register of services by the bull should be kept showing also the results - 40 to 50 services being expected every year.

(3) That the herd of cows served by the bull should be segregated from the rest of the village cattle or else all other male stock of the locality should be castrated.

(4) That the cows served should ordinarily be limited to those owned either by the members of the society or by a particular breeder or group of breeders.

(5) That in the case of a society, it may fix its own scale of fees for services whereas in the case of an individual the fee may be limited to As.4 for each service for the present.

## RULES FOR THE ENCOURAGEMENT OF STOCK BREEDING.

A grant of Rs. 125 to Rs. 150 a year will be made to an individual or a society for purchasing and maintaining at his or at its cost a good breeding bull, he-buffalo or a stallion, subject to the following conditions :—

1. The grant will be made by the Deputy Commissioner and President of the District Committee at the end of the official year on a report of inspection received from Superintendent, Civil Veterinary Department. It will be renewable every year for the same animal for a maximum period of four years. The grant will be withdrawn whenever the animal becomes disabled or a change of animal is considered essential.

2. The stallion, bull or he-buffalo should be housed properly and maintained in good condition.

3. A register of service by the animal showing the date, month and year should be maintained, the number of covering in the year not falling below 40.

4. The owner of an animal is authorised to levy for each service a fee to be fixed by the Deputy Commissioner, in the first instance when application is made for the grant of a subvention under the rules and subsequently when the subvention is awarded year after year, after due consideration of the quality of the breeding animal and the conditions of the locality.

The registers will be in the following printed form which will be supplied free from the Agricultural Committee to the districts for distribution.

In each district, a register of the awards of subventions made under the rules shall be maintained in the following forms and after each award, a certified copy of the entry relating thereto shall be delivered to the owner of the breeding animal.

1. Name of village, taluk and district.
2. Name of owner of the stallion, bull or buffalo.
3. Age, breed, pedigree and marks of identification of the animal.
4. The cost for which and the locality from which it was purchased.
5. The date from which it has been maintained.
6. The date and authority of award.
7. Date and authority of renewal.

1. Date, month and year.
2. Description of the animal covered including its age and the number of foals or calves she has had previously.
3. Fees collected.
4. Name of its owner and village.
5. The result of the covering.

All the breeding animals to which subventions have been granted in a district shall be inspected not less than once a year by an officer of the Civil Veterinary Department who shall within a week after inspection submit a report to the Deputy Commissioner in the subjoined form.

*Report of Inspection.*

1. Name of village, taluk and district.
2. Name of owner of the breeding animal.
3. Age, breed, pedigree and marks of identification.
4. The cost for which and the locality from which it was purchased.
5. The date from which it has been maintained.
6. Date and authority of award.
7. Date and authority of renewal.
8. Condition of animal, stall and premises.
9. Number of coverings since last inspection.
10. Has the service register been properly maintained.
11. Number of calves or foals due to this breeding animal inspected, with remarks, if any.
